

Touch-Wallterminal

Door opening after license plate entry

DESCRIPTION

Secure access - 24/7! Our robust wall reader with large touchscreen enables authorized access to modern parking garages and parking lots that are operated ticketless or freeflow.

OPERATION

Simply enter the license plate number and the door opens - without a key or ticket. If the license plate number is not known in the system, assistance and a remote opening can be requested via the integrated intercom. Alternatively, long-term parkers or employees can authorize themselves using a QR code on the integrated reader.

PROS

- Simple operation without tickets - enter the license plate number and go through
- Seamless integration - perfectly matched to our ticketless parking systems
- Secured access - ideal for secure 24/7 operation of public parkings
- Robust fallback thanks to intercom and QR reader
