

Wallterminal

Reader for QR-tickets and RFID-cards

DESCRIPTION

This splash-proof wallterminal is designed for on-wall mounting, making it ideal for harsh environmental conditions. The rugged housing, the capacitive touch buttons and the contactless readers ensure a wear-free operation. Likewise, the cash-free operation reduces the risk of break up and theft. The terminal can be used for

- access function
e.g. for controlled access to the parking garage
- billing function
e.g. for the activation of e-car chargers

MEDIA

The terminal is online-connected to the pay station EMS-4000 or serverbox. QR-tickets as well as RFID-cards can be processed.

OPERATION

After providing a QR-ticket or RFID-card, the authorization is checked and the output relay is released.

FEATURES

- nonwearing RFID technology
- QR-scanner with tray table
- high-contrast graphic display (H x W): 38 x 65 mm
- RGB-LEDs and acoustic feedback
- four capacitive touch-buttons beside the display
- encapsulated housing for rough outdoor environment
- relay switching capacity 16A AC1 or potential-free, NC and NO contacts available
- potential-free input for backpulses of devices available
- Phoenix-Cloud for remote access and settings
- transparent front (material PC-FR, impact resistant)
- graphite gray plastic housing (material PC-FR)
- wall bracket (stainless steel, powdered RAL 7024)
- weight: 1,1 kg
- dimensions (HxWxD): 265 x 125 x 130 mm

VARIANTS

- control of one single device (1x output relais)
- control of two devices (2x output relais)
